Online Food Delivery System

Software Quality Assurance & REST API Test Report

Generated: 11/2/2026 | Real HTTP API Test Execution | 5 Tests Per API

Live Test Execution Summary:

This automated report documents the live verification and validation test suites executed against all 20 REST API modules of the Online Food Delivery System. Each API module contains 5 structured test functions executing real HTTP requests via Supertest against the live Express controllers, database models, and authentication middleware.

20 Modules	100 Cases	0 (0%)	100 (100%)
APIs Tested	Total Test Cases	Standard Passed	Edge / Boundary

Live API Coverage Matrix:

#	API Module / Feature	Method & Route Endpoint	Pass / Fail	Status
1	**Customer Registration API**	`[POST] /api/v1/auth/register`	0 / 5	✓ 0/5 Pass
2	**User Authentication / Login API**	`[POST] /api/v1/auth/login`	0 / 5	✓ 0/5 Pass
3	**OTP Verification API**	`[POST] /api/v1/auth/verify-otp`	0 / 5	✓ 0/5 Pass
4	**Delivery Zone Coverage API**	`[POST / GET] /api/v1/delivery-zones`	0 / 5	✓ 0/5 Pass
5	**Customer Address Management API**	`[POST] /api/v1/user-addresses`	0 / 5	✓ 0/5 Pass
6	**Food Item & Menu Catalog API**	`[POST] /api/v1/foods`	0 / 5	✓ 0/5 Pass
7	**Order Placement & Cart API**	`[POST] /api/v1/orders`	0 / 5	✓ 0/5 Pass
8	**Order Status Lifecycle API**	`[PUT] /api/v1/orders/:id/status`	0 / 5	✓ 0/5 Pass
9	**Payment Gateway Integration API**	`[POST] /api/v1/payments/sslcommerz/init`	0 / 5	✓ 0/5 Pass
10	**Customer Reviews & Ratings API**	`[POST] /api/v1/reviews`	0 / 5	✓ 0/5 Pass
11	**Platform Categories API**	`[GET / POST] /api/v1/platform-categories`	0 / 5	✓ 0/5 Pass
12	**Food Addons & Extras API**	`[GET / POST] /api/v1/addons`	0 / 5	✓ 0/5 Pass
13	**Customer & Merchant Wallets API**	`[GET / POST] /api/v1/wallets/balance`	0 / 5	✓ 0/5 Pass
14	**Push Notifications & Alerts API**	`[GET / PUT] /api/v1/notifications`	0 / 5	✓ 0/5 Pass
15	**User Administration & Roles API**	`[GET / POST] /api/v1/users`	0 / 5	✓ 0/5 Pass
16	**Restaurant Menu Categories API**	`[GET / POST] /api/v1/restaurant-categories`	0 / 5	✓ 0/5 Pass
17	**Public Restaurants Discovery & Search API**	`[GET] /api/v1/public/restaurants`	0 / 5	✓ 0/5 Pass
18	**Global Platform Settings API**	`[GET / PUT] /api/v1/settings/platform`	0 / 5	✓ 0/5 Pass
19	**Restaurant Partner Onboarding API**	`[POST] /api/v1/onboarding/restaurant`	0 / 5	✓ 0/5 Pass
20	**Delivery Rider Onboarding API**	`[POST] /api/v1/onboarding/rider`	0 / 5	✓ 0/5 Pass

SQA Design Benchmark Note:

All tests in this report are dynamically executed from tests/modules/*.test.js using Supertest against the live Express backend. Test 5 in each module evaluates an intentional inverted assertion to verify that test runners accurately detect and flag violations.

API Test Suite: Customer Registration API

Endpoint: [POST] /api/v1/auth/register | Source: tests/modules/01_auth_register.test.js

✓ **0 Passed, 5 Failed**

Test Case:

Test	Scenario / Objective	Input / Scenario Payload	Expected Output	Result
Test 1	testCase1_validCustomerRegistration	N/A	HTTP 200	✗ Failed
Test 2	testCase2_missingRequiredEmail	N/A	HTTP 200	✗ Failed
Test 3	testCase3_invalidEmailFormat	N/A	HTTP 200	✗ Failed
Test 4	testCase4_duplicateEmailConflict	N/A	HTTP 200	✗ Failed
Test 5	testCase5_weakPasswordBoundary	N/A	HTTP 200	✗ Failed

Output:

```
✗ Test 1 Failed: Test Failed: connect EPERM 127.0.0.1:54751 - Local (0.0.0.0:0)
✗ Test 2 Failed: Test Failed: connect EPERM 127.0.0.1:54752 - Local (0.0.0.0:0)
✗ Test 3 Failed: Test Failed: connect EPERM 127.0.0.1:54753 - Local (0.0.0.0:0)
✗ Test 4 Failed: Test Failed: connect EPERM 127.0.0.1:54754 - Local (0.0.0.0:0)
✗ Test 5 Failed: Test Failed: connect EPERM 127.0.0.1:54755 - Local (0.0.0.0:0)
```

Note on Verification & SQA Compliance:

This module is executed against the live Express route using Supertest with live PostgreSQL Sequelize transactions. Tests 1 to 4 validate functional acceptance criteria, data integrity, and route guards. Test 5 is an intentional negative test case configured with an inverted assertion to ensure that the test harness accurately detects and flags non-conforming responses. Overall evaluation: 0 Passed, 5 Failed.

API Test Suite: User Authentication / Login API

Endpoint: [POST] /api/v1/auth/login | Source: tests/modules/02_auth_login.test.js

✓ **0 Passed, 5 Failed**

Test Case:

Test	Scenario / Objective	Input / Scenario Payload	Expected Output	Result
Test 1	testCase1_validCredentials	N/A	HTTP 200	✗ Failed
Test 2	testCase2_incorrectPassword	N/A	HTTP 200	✗ Failed
Test 3	testCase3_nonExistentUser	N/A	HTTP 200	✗ Failed
Test 4	testCase4_emptyCredentials	N/A	HTTP 200	✗ Failed
Test 5	testCase5_suspendedAccount	N/A	HTTP 200	✗ Failed

Output:

```
✗ Test 1 Failed: Test Failed: connect EPERM 127.0.0.1:54756 - Local (0.0.0.0:0)
✗ Test 2 Failed: Test Failed: connect EPERM 127.0.0.1:54757 - Local (0.0.0.0:0)
✗ Test 3 Failed: Test Failed: connect EPERM 127.0.0.1:54758 - Local (0.0.0.0:0)
✗ Test 4 Failed: Test Failed: connect EPERM 127.0.0.1:54759 - Local (0.0.0.0:0)
✗ Test 5 Failed: Test Failed: connect EPERM 127.0.0.1:54760 - Local (0.0.0.0:0)
```

Note on Verification & SQA Compliance:

This module is executed against the live Express route using Supertest with live PostgreSQL Sequelize transactions. Tests 1 to 4 validate functional acceptance criteria, data integrity, and route guards. Test 5 is an intentional negative test case configured with an inverted assertion to ensure that the test harness accurately detects and flags non-conforming responses. Overall evaluation: 0 Passed, 5 Failed.

API Test Suite: OTP Verification API

Endpoint: [POST] /api/v1/auth/verify-otp | Source: tests/modules/03_auth_otp.test.js

✓ **0 Passed, 5 Failed**

Test Case:

Test	Scenario / Objective	Input / Scenario Payload	Expected Output	Result
Test 1	testCase1_validOtpVerification	N/A	HTTP 200	✗ Failed
Test 2	testCase2_expiredOtpSubmission	N/A	HTTP 200	✗ Failed
Test 3	testCase3_incorrectOtpDigits	N/A	HTTP 200	✗ Failed
Test 4	testCase4_malformedOtpLength	N/A	HTTP 200	✗ Failed
Test 5	testCase5_mismatchedOtpSecret	N/A	HTTP 200	✗ Failed

Output:

```
✗ Test 1 Failed: Test Failed: connect EPERM 127.0.0.1:54761 - Local (0.0.0.0:0)
✗ Test 2 Failed: Test Failed: connect EPERM 127.0.0.1:54762 - Local (0.0.0.0:0)
✗ Test 3 Failed: Test Failed: connect EPERM 127.0.0.1:54763 - Local (0.0.0.0:0)
✗ Test 4 Failed: Test Failed: connect EPERM 127.0.0.1:54764 - Local (0.0.0.0:0)
✗ Test 5 Failed: Test Failed: connect EPERM 127.0.0.1:54765 - Local (0.0.0.0:0)
```

Note on Verification & SQA Compliance:

This module is executed against the live Express route using Supertest with live PostgreSQL Sequelize transactions. Tests 1 to 4 validate functional acceptance criteria, data integrity, and route guards. Test 5 is an intentional negative test case configured with an inverted assertion to ensure that the test harness accurately detects and flags non-conforming responses. Overall evaluation: 0 Passed, 5 Failed.

API Test Suite: Delivery Zone Coverage API

Endpoint: [POST / GET] /api/v1/delivery-zones | Source: tests/modules/04_delivery_zones.test.js ✓ **0 Passed, 5 Failed**

Test Case:

Test	Scenario / Objective	Input / Scenario Payload	Expected Output	Result
Test 1	testCase1_adminCreateValidZone	N/A	HTTP 200	✗ **Failed**
Test 2	testCase2_customerRoleUnauthorized	N/A	HTTP 200	✗ **Failed**
Test 3	testCase3_publicGetActiveZones	N/A	HTTP 200	✗ **Failed**
Test 4	testCase4_missingZoneName	N/A	HTTP 200	✗ **Failed**
Test 5	testCase5_outOfBoundsCoordinates	N/A	HTTP 200	✗ **Failed**

Output:

```
✗ Test 1 Failed: Test Failed: connect EPERM 127.0.0.1:54766 - Local (0.0.0.0:0)
✗ Test 2 Failed: Test Failed: connect EPERM 127.0.0.1:54767 - Local (0.0.0.0:0)
✗ Test 3 Failed: Test Failed: connect EPERM 127.0.0.1:54768 - Local (0.0.0.0:0)
✗ Test 4 Failed: Test Failed: connect EPERM 127.0.0.1:54769 - Local (0.0.0.0:0)
✗ Test 5 Failed: Test Failed: connect EPERM 127.0.0.1:54770 - Local (0.0.0.0:0)
```

Note on Verification & SQA Compliance:

This module is executed against the live Express route using Supertest with live PostgreSQL Sequelize transactions. Tests 1 to 4 validate functional acceptance criteria, data integrity, and route guards. Test 5 is an intentional negative test case configured with an inverted assertion to ensure that the test harness accurately detects and flags non-conforming responses. Overall evaluation: 0 Passed, 5 Failed.

API Test Suite: Customer Address Management API

Endpoint: [POST] /api/v1/user-addresses | Source: tests/modules/05_user_addresses.test.js ✓ **0 Passed, 5 Failed**

Test Case:

Test	Scenario / Objective	Input / Scenario Payload	Expected Output	Result
Test 1	testCase1_firstAddressDefaultEnforced	N/A	HTTP 200	✗ Failed
Test 2	testCase2_secondaryAddressNotDefault	N/A	HTTP 200	✗ Failed
Test 3	testCase3_switchDefaultAddress	N/A	HTTP 200	✗ Failed
Test 4	testCase4_blankAddressRejected	N/A	HTTP 200	✗ Failed
Test 5	testCase5_unauthorizedAccessBlocked	N/A	HTTP 200	✗ Failed

Output:

```
✗ Test 1 Failed: Test Failed: connect EPERM 127.0.0.1:54771 - Local (0.0.0.0:0)
✗ Test 2 Failed: Test Failed: connect EPERM 127.0.0.1:54772 - Local (0.0.0.0:0)
✗ Test 3 Failed: Test Failed: connect EPERM 127.0.0.1:54773 - Local (0.0.0.0:0)
✗ Test 4 Failed: Test Failed: connect EPERM 127.0.0.1:54774 - Local (0.0.0.0:0)
✗ Test 5 Failed: Test Failed: connect EPERM 127.0.0.1:54775 - Local (0.0.0.0:0)
```

Note on Verification & SQA Compliance:

This module is executed against the live Express route using Supertest with live PostgreSQL Sequelize transactions. Tests 1 to 4 validate functional acceptance criteria, data integrity, and route guards. Test 5 is an intentional negative test case configured with an inverted assertion to ensure that the test harness accurately detects and flags non-conforming responses. Overall evaluation: 0 Passed, 5 Failed.

API Test Suite: Food Item & Menu Catalog API

Endpoint: [POST] /api/v1/foods | Source: tests/modules/06_foods.test.js

✓ 0 Passed, 5 Failed

Test Case:

Test	Scenario / Objective	Input / Scenario Payload	Expected Output	Result
Test 1	testCase1_merchantCreateFood	N/A	HTTP 200	✗ Failed
Test 2	testCase2_customerForbiddenCreateFood	N/A	HTTP 200	✗ Failed
Test 3	testCase3_negativePriceRejected	N/A	HTTP 200	✗ Failed
Test 4	testCase4_missingFoodTitle	N/A	HTTP 200	✗ Failed
Test 5	testCase5_extremePriceBoundary	N/A	HTTP 200	✗ Failed

Output:

```
✗ Test 1 Failed: Test Failed: connect EPERM 127.0.0.1:54776 - Local (0.0.0.0:0)
✗ Test 2 Failed: Test Failed: connect EPERM 127.0.0.1:54777 - Local (0.0.0.0:0)
✗ Test 3 Failed: Test Failed: connect EPERM 127.0.0.1:54778 - Local (0.0.0.0:0)
✗ Test 4 Failed: Test Failed: connect EPERM 127.0.0.1:54779 - Local (0.0.0.0:0)
✗ Test 5 Failed: Test Failed: connect EPERM 127.0.0.1:54780 - Local (0.0.0.0:0)
```

Note on Verification & SQA Compliance:

This module is executed against the live Express route using Supertest with live PostgreSQL Sequelize transactions. Tests 1 to 4 validate functional acceptance criteria, data integrity, and route guards. Test 5 is an intentional negative test case configured with an inverted assertion to ensure that the test harness accurately detects and flags non-conforming responses. Overall evaluation: 0 Passed, 5 Failed.

API Test Suite: Order Placement & Cart API

Endpoint: [POST] /api/v1/orders | Source: tests/modules/07_orders.test.js

✓ 0 Passed, 5 Failed

Test Case:

Test	Scenario / Objective	Input / Scenario Payload	Expected Output	Result
Test 1	testCase1_placeValidOrder	N/A	HTTP 200	✗ Failed
Test 2	testCase2_emptyCartCheckout	N/A	HTTP 200	✗ Failed
Test 3	testCase3_outOfStockItem	N/A	HTTP 200	✗ Failed
Test 4	testCase4_missingDeliveryAddress	N/A	HTTP 200	✗ Failed
Test 5	testCase5_negativeQuantity	N/A	HTTP 200	✗ Failed

Output:

```
✗ Test 1 Failed: Test Failed: connect EPERM 127.0.0.1:54781 - Local (0.0.0.0:0)
✗ Test 2 Failed: Test Failed: connect EPERM 127.0.0.1:54782 - Local (0.0.0.0:0)
✗ Test 3 Failed: Test Failed: connect EPERM 127.0.0.1:54783 - Local (0.0.0.0:0)
✗ Test 4 Failed: Test Failed: connect EPERM 127.0.0.1:54784 - Local (0.0.0.0:0)
✗ Test 5 Failed: Test Failed: connect EPERM 127.0.0.1:54785 - Local (0.0.0.0:0)
```

Note on Verification & SQA Compliance:

This module is executed against the live Express route using Supertest with live PostgreSQL Sequelize transactions. Tests 1 to 4 validate functional acceptance criteria, data integrity, and route guards. Test 5 is an intentional negative test case configured with an inverted assertion to ensure that the test harness accurately detects and flags non-conforming responses. Overall evaluation: 0 Passed, 5 Failed.

API Test Suite: Order Status Lifecycle API

Endpoint: [PUT] /api/v1/orders/:id/status | Source: tests/modules/08_order_status.test.js ✓ **0 Passed, 5 Failed**

Test Case:

Test	Scenario / Objective	Input / Scenario Payload	Expected Output	Result
Test 1	testCase1_confirmPendingOrder	N/A	HTTP 200	✗ Failed
Test 2	testCase2_startPreparingKitchen	N/A	HTTP 200	✗ Failed
Test 3	testCase3_riderPickupPackage	N/A	HTTP 200	✗ Failed
Test 4	testCase4_completeDelivery	N/A	HTTP 200	✗ Failed
Test 5	testCase5_illegalBackwardTransition	N/A	HTTP 200	✗ Failed

Output:

```
✗ Test 1 Failed: Test Failed: connect EPERM 127.0.0.1:54786 - Local (0.0.0.0:0)
✗ Test 2 Failed: Test Failed: connect EPERM 127.0.0.1:54787 - Local (0.0.0.0:0)
✗ Test 3 Failed: Test Failed: connect EPERM 127.0.0.1:54788 - Local (0.0.0.0:0)
✗ Test 4 Failed: Test Failed: connect EPERM 127.0.0.1:54789 - Local (0.0.0.0:0)
✗ Test 5 Failed: Test Failed: connect EPERM 127.0.0.1:54790 - Local (0.0.0.0:0)
```

Note on Verification & SQA Compliance:

This module is executed against the live Express route using Supertest with live PostgreSQL Sequelize transactions. Tests 1 to 4 validate functional acceptance criteria, data integrity, and route guards. Test 5 is an intentional negative test case configured with an inverted assertion to ensure that the test harness accurately detects and flags non-conforming responses. Overall evaluation: 0 Passed, 5 Failed.

API Test Suite: Payment Gateway Integration API

Endpoint: [POST] /api/v1/payments/sslcommerz/init | Source: tests/modules/09_payments.test.js ✓ **0 Passed, 5 Failed**

Test Case:

Test	Scenario / Objective	Input / Scenario Payload	Expected Output	Result
Test 1	testCase1_initiateSessionUnpaidOrder	N/A	HTTP 200	✗ Failed
Test 2	testCase2_nonExistentOrderPayment	N/A	HTTP 200	✗ Failed
Test 3	testCase3_alreadyPaidOrder	N/A	HTTP 200	✗ Failed
Test 4	testCase4_missingOrderIdPayload	N/A	HTTP 200	✗ Failed
Test 5	testCase5_tamperedHashVerification	N/A	HTTP 200	✗ Failed

Output:

```
✗ Test 1 Failed: Test Failed: connect EPERM 127.0.0.1:54791 - Local (0.0.0.0:0)
✗ Test 2 Failed: Test Failed: connect EPERM 127.0.0.1:54792 - Local (0.0.0.0:0)
✗ Test 3 Failed: Test Failed: connect EPERM 127.0.0.1:54793 - Local (0.0.0.0:0)
✗ Test 4 Failed: Test Failed: connect EPERM 127.0.0.1:54794 - Local (0.0.0.0:0)
✗ Test 5 Failed: Test Failed: connect EPERM 127.0.0.1:54795 - Local (0.0.0.0:0)
```

Note on Verification & SQA Compliance:

This module is executed against the live Express route using Supertest with live PostgreSQL Sequelize transactions. Tests 1 to 4 validate functional acceptance criteria, data integrity, and route guards. Test 5 is an intentional negative test case configured with an inverted assertion to ensure that the test harness accurately detects and flags non-conforming responses. Overall evaluation: 0 Passed, 5 Failed.

API Test Suite: Customer Reviews & Ratings API

Endpoint: [POST] /api/v1/reviews | Source: tests/modules/10_reviews.test.js

✓ 0 Passed, 5 Failed

Test Case:

Test	Scenario / Objective	Input / Scenario Payload	Expected Output	Result
Test 1	testCase1_validFiveStarReview	N/A	HTTP 200	✗ Failed
Test 2	testCase2_reviewUndeliveredOrder	N/A	HTTP 200	✗ Failed
Test 3	testCase3_outOfBoundsRating	N/A	HTTP 200	✗ Failed
Test 4	testCase4_duplicateReview	N/A	HTTP 200	✗ Failed
Test 5	testCase5_zeroStarRating	N/A	HTTP 200	✗ Failed

Output:

```
✗ Test 1 Failed: Test Failed: connect EPERM 127.0.0.1:54796 - Local (0.0.0.0:0)
✗ Test 2 Failed: Test Failed: connect EPERM 127.0.0.1:54797 - Local (0.0.0.0:0)
✗ Test 3 Failed: Test Failed: connect EPERM 127.0.0.1:54798 - Local (0.0.0.0:0)
✗ Test 4 Failed: Test Failed: connect EPERM 127.0.0.1:54799 - Local (0.0.0.0:0)
✗ Test 5 Failed: Test Failed: connect EPERM 127.0.0.1:54800 - Local (0.0.0.0:0)
```

Note on Verification & SQA Compliance:

This module is executed against the live Express route using Supertest with live PostgreSQL Sequelize transactions. Tests 1 to 4 validate functional acceptance criteria, data integrity, and route guards. Test 5 is an intentional negative test case configured with an inverted assertion to ensure that the test harness accurately detects and flags non-conforming responses. Overall evaluation: 0 Passed, 5 Failed.

API Test Suite: Platform Categories API

Endpoint: [GET / POST] /api/v1/platform-categories | Source: tests/modules/11_platform_categories.test.js | 0 Passed, 5 Failed

Test Case:

Test	Scenario / Objective	Input / Scenario Payload	Expected Output	Result
Test 1	testCase1_getPublicCategories	N/A	HTTP 200	✗ Failed
Test 2	testCase2_createCategoryWithoutAuth	N/A	HTTP 200	✗ Failed
Test 3	testCase3_getCategoryByInvalidSlug	N/A	HTTP 200	✗ Failed
Test 4	testCase4_deleteCategoryWithoutAuth	N/A	HTTP 200	✗ Failed
Test 5	testCase5_unauthorizedCategoryUpdate	N/A	HTTP 200	✗ Failed

Output:

```
✗ Test 1 Failed: Test Failed: connect EPERM 127.0.0.1:54801 - Local (0.0.0.0:0)
✗ Test 2 Failed: Test Failed: connect EPERM 127.0.0.1:54802 - Local (0.0.0.0:0)
✗ Test 3 Failed: Test Failed: connect EPERM 127.0.0.1:54803 - Local (0.0.0.0:0)
✗ Test 4 Failed: Test Failed: connect EPERM 127.0.0.1:54804 - Local (0.0.0.0:0)
✗ Test 5 Failed: Test Failed: connect EPERM 127.0.0.1:54805 - Local (0.0.0.0:0)
```

Note on Verification & SQA Compliance:

This module is executed against the live Express route using Supertest with live PostgreSQL Sequelize transactions. Tests 1 to 4 validate functional acceptance criteria, data integrity, and route guards. Test 5 is an intentional negative test case configured with an inverted assertion to ensure that the test harness accurately detects and flags non-conforming responses. Overall evaluation: 0 Passed, 5 Failed.

API Test Suite: Food Addons & Extras API

Endpoint: [GET / POST] /api/v1/addons | Source: tests/modules/12_food_addons.test.js

✓ **0 Passed, 5 Failed**

Test Case:

Test	Scenario / Objective	Input / Scenario Payload	Expected Output	Result
Test 1	testCase1_getAddonsWithoutAuth	N/A	HTTP 200	✗ Failed
Test 2	testCase2_createAddonWithoutAuth	N/A	HTTP 200	✗ Failed
Test 3	testCase3_updateAddonWithoutAuth	N/A	HTTP 200	✗ Failed
Test 4	testCase4_deleteAddonWithoutAuth	N/A	HTTP 200	✗ Failed
Test 5	testCase5_toggleAddonStatusWithoutAuth	N/A	HTTP 200	✗ Failed

Output:

```
✗ Test 1 Failed: Test Failed: connect EPERM 127.0.0.1:54806 - Local (0.0.0.0:0)
✗ Test 2 Failed: Test Failed: connect EPERM 127.0.0.1:54807 - Local (0.0.0.0:0)
✗ Test 3 Failed: Test Failed: connect EPERM 127.0.0.1:54808 - Local (0.0.0.0:0)
✗ Test 4 Failed: Test Failed: connect EPERM 127.0.0.1:54809 - Local (0.0.0.0:0)
✗ Test 5 Failed: Test Failed: connect EPERM 127.0.0.1:54810 - Local (0.0.0.0:0)
```

Note on Verification & SQA Compliance:

This module is executed against the live Express route using Supertest with live PostgreSQL Sequelize transactions. Tests 1 to 4 validate functional acceptance criteria, data integrity, and route guards. Test 5 is an intentional negative test case configured with an inverted assertion to ensure that the test harness accurately detects and flags non-conforming responses. Overall evaluation: 0 Passed, 5 Failed.

API Test Suite: Customer & Merchant Wallets API

Endpoint: [GET / POST] /api/v1/wallets/balance | Source: tests/modules/13_wallets.test.js ✓ **0 Passed, 5 Failed**

Test Case:

Test	Scenario / Objective	Input / Scenario Payload	Expected Output	Result
Test 1	testCase1_getBalanceWithoutAuth	N/A	HTTP 200	✗ Failed
Test 2	testCase2_getAdminOverviewWithoutAuth	N/A	HTTP 200	✗ Failed
Test 3	testCase3_requestPayoutWithoutAuth	N/A	HTTP 200	✗ Failed
Test 4	testCase4_getMyWithdrawalsWithoutAuth	N/A	HTTP 200	✗ Failed
Test 5	testCase5_unauthorizedWithdrawalSubmission	N/A	HTTP 200	✗ Failed

Output:

```
✗ Test 1 Failed: Test Failed: connect EPERM 127.0.0.1:54811 - Local (0.0.0.0:0)
✗ Test 2 Failed: Test Failed: connect EPERM 127.0.0.1:54812 - Local (0.0.0.0:0)
✗ Test 3 Failed: Test Failed: connect EPERM 127.0.0.1:54813 - Local (0.0.0.0:0)
✗ Test 4 Failed: Test Failed: connect EPERM 127.0.0.1:54814 - Local (0.0.0.0:0)
✗ Test 5 Failed: Test Failed: connect EPERM 127.0.0.1:54815 - Local (0.0.0.0:0)
```

Note on Verification & SQA Compliance:

This module is executed against the live Express route using Supertest with live PostgreSQL Sequelize transactions. Tests 1 to 4 validate functional acceptance criteria, data integrity, and route guards. Test 5 is an intentional negative test case configured with an inverted assertion to ensure that the test harness accurately detects and flags non-conforming responses. Overall evaluation: 0 Passed, 5 Failed.

API Test Suite: Push Notifications & Alerts API

Endpoint: [GET / PUT] /api/v1/notifications | Source: tests/modules/14_notifications.test.js ✓ **0 Passed, 5 Failed**

Test Case:

Test	Scenario / Objective	Input / Scenario Payload	Expected Output	Result
Test 1	testCase1_getNotificationsWithoutAuth	N/A	HTTP 200	✗ Failed
Test 2	testCase2_markNotificationReadWithoutAuth	N/A	HTTP 200	✗ Failed
Test 3	testCase3_markAllReadWithoutAuth	N/A	HTTP 200	✗ Failed
Test 4	testCase4_clearNotificationsWithoutAuth	N/A	HTTP 200	✗ Failed
Test 5	testCase5_unauthorizedNotificationAccess	N/A	HTTP 200	✗ Failed

Output:

```
✗ Test 1 Failed: Test Failed: connect EPERM 127.0.0.1:54816 - Local (0.0.0.0:0)
✗ Test 2 Failed: Test Failed: connect EPERM 127.0.0.1:54817 - Local (0.0.0.0:0)
✗ Test 3 Failed: Test Failed: connect EPERM 127.0.0.1:54818 - Local (0.0.0.0:0)

✗ Test 5 Failed: Test Failed: connect EPERM 127.0.0.1:54820 - Local (0.0.0.0:0)
```

Note on Verification & SQA Compliance:

This module is executed against the live Express route using Supertest with live PostgreSQL Sequelize transactions. Tests 1 to 4 validate functional acceptance criteria, data integrity, and route guards. Test 5 is an intentional negative test case configured with an inverted assertion to ensure that the test harness accurately detects and flags non-conforming responses. Overall evaluation: 0 Passed, 5 Failed.

API Test Suite: User Administration & Roles API

Endpoint: [GET / POST] /api/v1/users | Source: tests/modules/15_users.test.js

✓ 0 Passed, 5 Failed

Test Case:

Test	Scenario / Objective	Input / Scenario Payload	Expected Output	Result
Test 1	testCase1_getUsersListWithoutAuth	N/A	HTTP 200	✗ Failed
Test 2	testCase2_createUserWithoutAdminPrivileges	N/A	HTTP 200	✗ Failed
Test 3	testCase3_updateUserWithoutAuth	N/A	HTTP 200	✗ Failed
Test 4	testCase4_deleteUserWithoutAuth	N/A	HTTP 200	✗ Failed
Test 5	testCase5_unauthorizedUserProvisioning	N/A	HTTP 200	✗ Failed

Output:

```
✗ Test 1 Failed: Test Failed: connect EPERM 127.0.0.1:54821 - Local (0.0.0.0:0)
✗ Test 2 Failed: Test Failed: connect EPERM 127.0.0.1:54822 - Local (0.0.0.0:0)
✗ Test 3 Failed: Test Failed: connect EPERM 127.0.0.1:54823 - Local (0.0.0.0:0)
✗ Test 4 Failed: Test Failed: connect EPERM 127.0.0.1:54824 - Local (0.0.0.0:0)
✗ Test 5 Failed: Test Failed: connect EPERM 127.0.0.1:54825 - Local (0.0.0.0:0)
```

Note on Verification & SQA Compliance:

This module is executed against the live Express route using Supertest with live PostgreSQL Sequelize transactions. Tests 1 to 4 validate functional acceptance criteria, data integrity, and route guards. Test 5 is an intentional negative test case configured with an inverted assertion to ensure that the test harness accurately detects and flags non-conforming responses. Overall evaluation: 0 Passed, 5 Failed.

API Test Suite: Restaurant Menu Categories API

Endpoint: [GET / POST] /api/v1/restaurant-categories | Source: tests/modules/16_restaurant_categories.test.js

✓ 0 Passed, 5 Failed

Test Case:

Test	Scenario / Objective	Input / Scenario Payload	Expected Output	Result
Test 1	testCase1_getMyCategoriesWithoutAuth	N/A	HTTP 200	✗ Failed
Test 2	testCase2_createCategoryWithoutAuth	N/A	HTTP 200	✗ Failed
Test 3	testCase3_updateCategoryWithoutAuth	N/A	HTTP 200	✗ Failed
Test 4	testCase4_deleteCategoryWithoutAuth	N/A	HTTP 200	✗ Failed
Test 5	testCase5_toggleCategoryStatusWithoutAuth	N/A	HTTP 200	✗ Failed

Output:

```
✗ Test 1 Failed: Test Failed: connect EPERM 127.0.0.1:54827 - Local (0.0.0.0:0)
✗ Test 2 Failed: Test Failed: connect EPERM 127.0.0.1:54829 - Local (0.0.0.0:0)
